NEVER EXPERIENCE A PUNCTURE AGAIN

ARE FLAT TYRES Ruining your day?

INSTALL PFZ AND DRIVE WITH NO HASSLE

What is PFZ Anti Puncture Liquid?

It is a fluid that is injected into the tyre or inner tube and it instantaneously fills any puncture as soon as it occurs.

Being stranded with a flat tyre is a nightmare for every driver, A flat tyre can be a harrowing experience, It usually happens when you are in a great hurry to get somewhere. If you have a spare tyre and you know how to change it, then that's great but if you don't you will need to look for a towing service road side assistance available in your area.

Common Causes for Tyre Breakdowns :

- 1) Sharp pointed objects like nails, Tree barks and Twigs, Glass.
- 2) Defective thread from the tyre manufacturer.
- 3) Burn outs due to sudden acceleration and breaking.
- 4) Hot Temperatures during summer.
- 5) Exceeding the maximum speed rating marked by the manufacturer.

From the above mentioned causes, Research has found that 85% of tyre breakdowns are due to damage done by sharp pointed objects and it only happens on the tread area of the tyre.

PFZ ANTI PUNCTURE LIQUID

A breakthrough in automotive industry. It's Specially designed fibre based binding technology seals and repairs punctures as it happens. One time installation of this liquid will prevent flat tyres till the life of the tyre.

FREQUENTLY ASKED QUESTIONS

Q.1) Is PFZ Anti Puncture Liquid Safe and Legal to install in my tyres?

Answer : Safe ? : Yes---Legal? : Yes.

Q.2) Does PFZ affect my tyre's performance?

Answer : Regarding Tyre's Performance, not adversely. PFZ does not affect tyre structure or rubber. Regarding the life of the tyre, there is a possibility that the tyre life will be extended, tests are underway to prove this.

Q.3) Will PFZ corrode my wheels?

Answer : No, There are no corrosion inhibitors in PFZ formulation and if any residue is touching the inner rim it can be washed off when a tyre is changed.

Q.4) Does PFZ cause wheel imbalance?

Answer : No, If prescribed quantity is installed, If too much of liquid is installed it may cause a slight wheel imbalance.

Q.5) How many holes will PFZ seal?

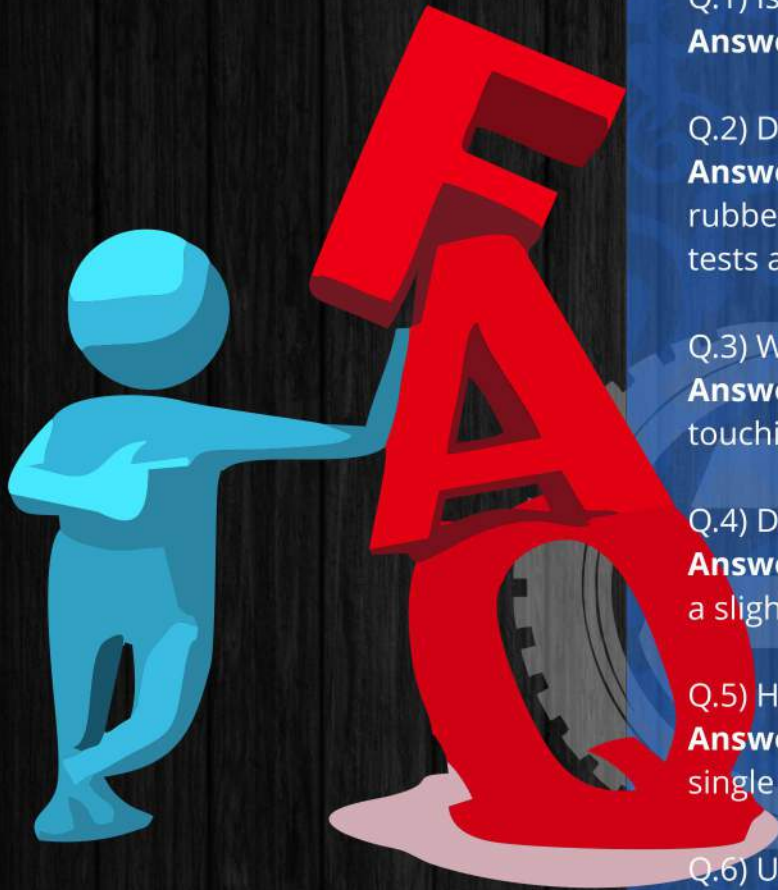

Answer : PFZ is designed to seal many holes, A very small amount of PFZ is used to seal a single hole.

Q.6) Upto what size of puncture can PFZ successfully seal?

Answer : In tests, PFZ has sealed holes caused by puncturing objects with a diameter of 8mm on tubeless tyres and 3mm on tube tyres. In fact it has sealed larger. 99% of all puncture cases fall within 4mm on motorcycles and 8mm on cars and big vehicles.

Q.7) Do I have to get my tyre puncture fixed after PFZ has sealed the puncture?

Answer : No, It is not necessary.

ABOUT US

Kaizen was formed in 2011, Today we are the leading Suppliers of Anti Puncture liquid in South India, We are based in Bangalore at our office in Indiranagar. Over the Years we have been known for our people centric attitude and our excellent customer service, We aim to provide the best quality product and the best customer service at the best price. Punctures are one of the prime reasons for accidents, Which inspired us to create a company that works for the safety of people, We look forward to grow as a people friendly company.
